Our Mission & Vision

To connect people around the world with one another, And empower the life of millions of individuals by providing financial help. Everyone deserves a better life and they should have it now and MAGIC BLAST is here to ensure it with the unique binaricalmatrix programmed

WHAT IS USDT

Tether (USDT) is a block chain-based crypto currency whose tokens in circulation are backed by an equivalent amount of U.S. dollars, making it a stable coin with a price pegged to USD \$1.00. Stable coins track traditional fiat currencies, like the dollar, the euro, or the Japanese yen, which are held in a designated bank account.

Tether belongs to a breed of crypto currencies called stable coins which aim to keep crypto currency valuations stable, as opposed to the wide swings observed in the prices of other popular crypto currencies like Bitcoin and Ethereum. That would allow it to be used as a medium of exchange and a mode of storage of value, instead of being used as a medium of speculative investments.

Tether is useful for crypto investors because it offers a way to avoid the extreme volatility of other crypto currencies. Furthermore, having USDT (as opposed to the U.S. dollar) removes transaction costs and delays that impair trade execution within the crypto market.

Future of Crypto Currency

WHAT IS CRYPTOCURRENCY?

A cryptocurrency is a digital currency, which is an alternative form of payment created using encryption algorithms. The use of encryption technologies means that cryptocurrencies function both as a currency and as a virtual accounting system. To use cryptocurrencies, you need a cryptocurrency wallet.

crypto is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any central authority, such as a government or bank, to uphold or maintain it.
